The trading portfolio of the Atlantis Private Algorithmic Hedge Fund is realized with a daily frequency of trading in high liquidity markets. The objective of the fund is to provide an absolute return with a moderate risk profile and low correlation of the underlying assets. The Fund seeks to achieve its objectives by developing, testing, and implementing a portfolio of systematic and algorithmic trading models. The trading portfolio includes several market assets in metals, currency instruments, indices, and energy assets. Execution of individual trades takes place in regulated, centralized, and derivative markets.

The strategy executes long and short positions to benefit from the identified short, medium, and seasonal trends and trends resulting from repetitive patterns, price formations. The system can apply a hedge trading approach in critical situations and high volatility. The goal of the portfolio, which is calibrated from ~ 50 logically different trading systems, is to provide profit each month. Our risk management is strictly based on clearly defined rules of a dynamically changing portfolio that constantly adapts to market conditions. We rely on an attractive return-to-risk ratio and stability.

## Cooperation with TA3 television

Our CEO Atlantis Capital Group JUDr. Ľuboš Žuffa has proven that he is an expert in finance and investments. Based on this, TA3 television decided to cooperate with him throughout the year 2024. You will see him not only in the show "Investujeme", but also in the show "Financie+". Moreover, he will be a speaker at conferences organized by TA3 television.

You will be able to see him already on March 26th, 2024 in the "Investujeme" show. The topic should be the world economy, stricter monetary policy and the situation with bonds.
